Hello:

I made some changes to the table. You should compare to find them.

- 1. I would like to have a D code column;**
- 2. Heptachlor and Heptachlor Epoxide although they may not have the same CAS they have the same TCLP value;**
- 3. 2 methylphenol and 3&4 Methylphenol should have the same TCLP value;**
- 4. Change the Name of the LDRs to Universal Treatment Standards (UTS) and their should be column for wastewaters and a column for Non-Wastewaters, I do not really want the data compared to the UTS but do want them in there for reference. Please reconfirm the Universal Treatment Standards (40CFR268)**

Gary,

Here is a draft summary table of the two tank samples. Please let me know if the screening levels are not what you were looking for. Additionally, as I stated previously, we do not have dioxin/furan data yet.

Thanks,

Kristie

Kristie:

The data should be compared against the regulatory numbers (TCLP, RCI) then also have a column for reference for the Land Disposal Restrictions.

Thanks

Gary,

Sorry I missed your call. Here is the final data from the tank samples. The emails with the data ended up getting moved out of my inbox before I processed them. Here is a PDF and the excel file. I'll load this data to the Scribe file now. Based on the email below, you want to compare these tank samples to the TCLP disposal criteria. We should have these already in our master screening level database. I am not sure about Land Disposal Restriction Numbers. I will look those up.

Mark, how quickly can you run tables?

Thanks,

Kristie

Kristie/Mark:

Have we gotten all the analytical data back from our sampling of TT 407 and 408?. If so, Is it in a table?

I would like to use screening numbers for this for TCLP regulatory numbers and the Land Disposal Restriction Numbers.

How quickly can you get this to me?

Thanks
